

Letter from Glenn H. Curtiss to Mauro, Cameron, Lewis & Massie, March 21, 1912

Coronado, Cal., March 21, 1912. Mauro, Cameron, Lewis & Massie, 700 10th St., N. W., Washington, DC. Dear Mr. Cameron,-

I am in receipt of a paper from the Patent Office marked Division 22, Paper #15. in reference to interferences in patent application. I do not quite understand what this matter of counts means. In the columns under the heading "The relation of counts to the interference to the claims of the respective parties" it shows many more counts under Myers than under Bell. Will you please give me a brief explanation of this.

I am acquainted with Myers who spent some time at Hammondsport and I am confident that whatever ideas he has which conflict with us he got there as he was working on entirely different lines when he came there. It would seem that it would be easy to show priority.

Awaiting your reply, I am, Yours truly, G H Curtiss GHC.
